

HW#06 ISTE230	<b>RIT</b>   <b>Golisano</b> College of Computing and Information Sciences <b>School of Information</b>	Fall 2022
------------------	--	-----------

Homework 6

Posted Week 6

Due Thursday November 3, 2022 @ 11:59pm

Name: \_\_\_\_\_ (Lastname, Firstname)

## Inner Joins, Outer Joins, and Subqueries

### Use SCRIPT CreateBook.sql

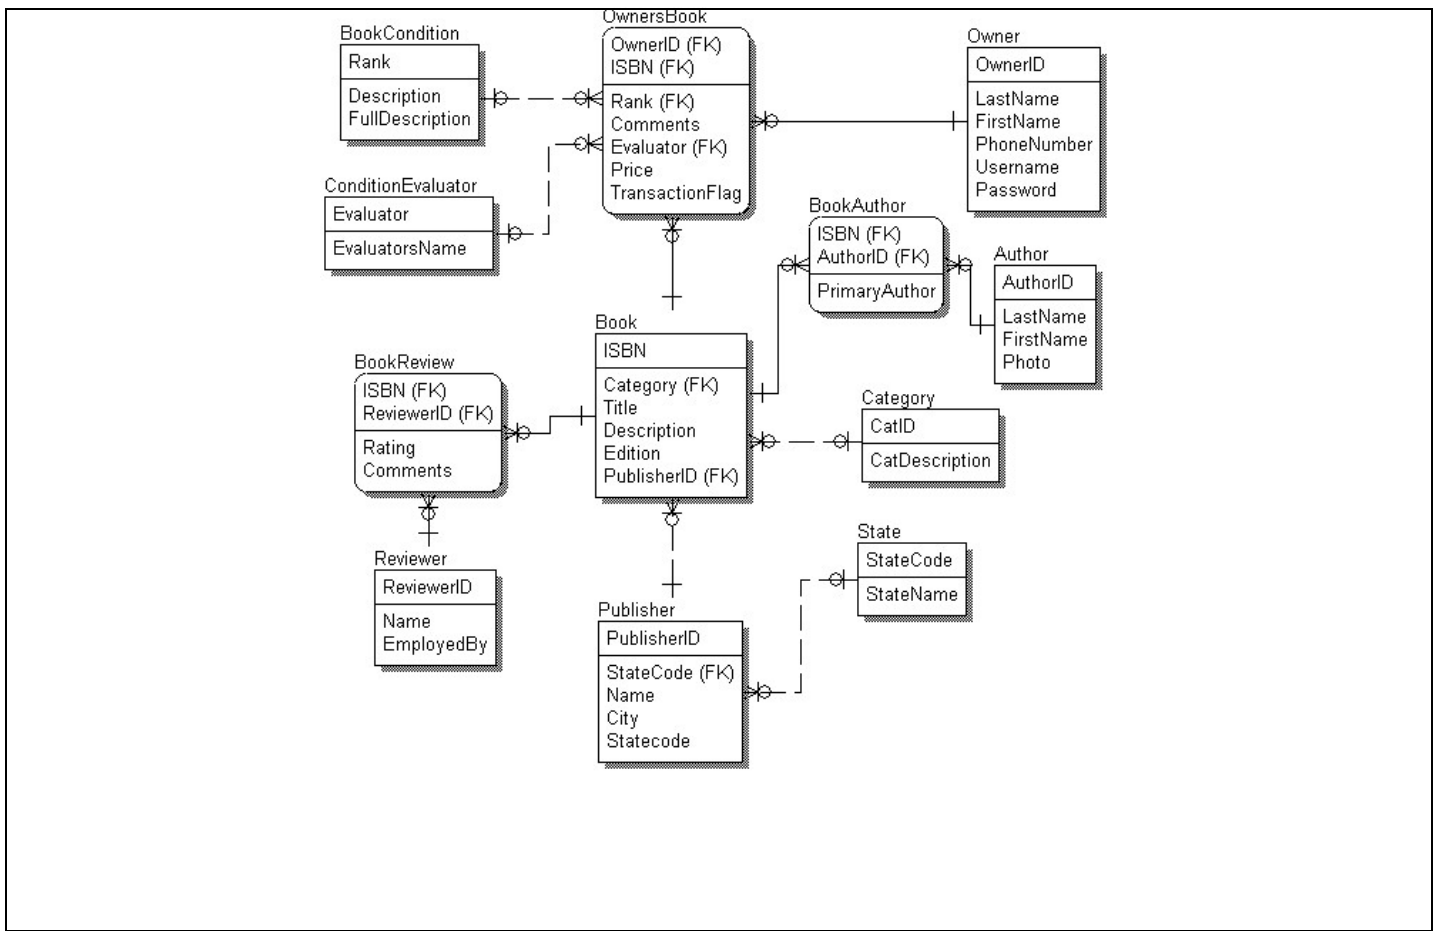

Note: submissions must be made to the appropriate Assignment / dropbox.

**You must have many source code comments like the following**

```
-- Lastname, Firstname
-- HW# 06
-- Current Date
-- ISTE230
-- Professor: Habermas, James

-- TEE file with comments above every question, Script file with comments above every question just like the following
-- Question 1 - GOAL: SQL statement that will show the title for each book and its category description
```

ERWin model of Book Trading database (foreign keys included for your convenience).

## Homework #06

In this homework, the Universe of Discourse is a portion of a (hypothetical) Book Trading database, used to capture information about books that are owned and traded among college students in IT. Captured in English, the entities of this Universe of Discourse, and the relationships among them, can be described like this:

- Book** .. (1) identified by an **ISBN**, (2) written by one primary **BookAuthor** and zero or more secondary **BookAuthors**, (3) categorized by subject matter **Category**, (4) published by **Publisher**, and (5) reviewed in a given **BookReview**
- BookAuthor** .. individuals that are either the primary or secondary author(s) of a specific **Book** occurrence
- Author** .. individuals that are primary or secondary authors
- BookReview** .. the rating assigned to a specific **Book** occurrence by a given **Reviewer**
- Reviewer** .. individuals that review **Books** and assign a rating to it
- OwnersBook** .. **Books** *owned* by **Owners** that are deemed to be in a certain **Condition** as rated by a **ConditionEvaluator**
- Owners** .. individuals that *own* **OwnersBooks**

## Homework #06

<b>Condition</b>	.. the set of <b>Condition</b> “rankings” (1..5, corresponding to “bad”, “poor”, “average”, “good” and “excellent”) that can be assigned to an <b>OwnersBook</b>
<b>ConditionEvaluator</b>	.. individuals that evaluate the condition of a book and assign a <b>Condition</b> to it
<b>Category</b>	... the set of <b>BOOK</b> subject matter classifications
<b>Publisher</b>	.. publishes <b>BOOKs</b> in a given U.S. <b>State</b>
<b>State</b>	.. state codes and full state names

### Download and install the book database

In MyCourses you will find a script called createBOOK.sql, download the file to your local hard drive. Run the 'createBOOK.sql' script within MySQL to create the BOOK database.

### Query the database

For each of the tasks that follow you will write a SQL statement that will answer the question given the specifications provided. The results you should achieve are shown after each task (unless a sort order is specified, if your records appear in a different order but the content is the same, that is fine).

The SQL statements all of the queries **must** be placed in one script file named ***yourlastnameH6.sql*** with a comment before your statements to indicate the query, for example "`-- Query 1`". Put the course number, your name and Homework 6 in comments at the top of the script file.

Create a tee file named ***yourLastnameH6.txt*** Make sure you have your name and section as a comment at the top of this tee file. With the verbose option on, execute your script named ***yourlastnameH6.sql*** Your tee file should show each command you created and the results of that command.

Do not use a zip file when turning in this project. Turn in your script and your tee file in the Homework drop box #6.

1. Write a SQL statement that will show the title for each book and its category description (sports, romance, etc). Sort the results first by category description in descending order, followed by title in ascending order.

title	catdescription
The Shortest Book in the World	Sports
Yes! Networking is for Bills Fans	Sports
Calculus for Phys Ed Majors	Science
I Lasted my Love's Last Lingering Longing	Romance
My Lost Love's Long Last Lingering	Romance
My Love's at Long Last Lost his Lingering	Romance
My Love's Last Lingering Lost	Romance
My Love's Last Longing	Romance
Women are From Venus ORACLE is from Beyond Pluto	Romance

## Homework #06

2. List the book titles and their ratings for all reviewers who do *not* work for a newspaper or any other news organization. A reviewer is employed by a newspaper, or other news organization, if their “Employed By” field contains a value.

```
+-----+-----+-----+
| name  | title                                     | rating |
+-----+-----+-----+
| Leone | How to Keep your Cellular Bill Down      | 7      |
| Leone | How to Keep your Cable Bill Down         | 7      |
